

18. Eshwara Temple(Bhogeshwara) Place - Yalisurur

District : Gadag
Taluk : Gadag
Locality : Yalisurur

Geo – Coordinates:
Lat : 15.2750 °N
Long : 75.6002 °E

History

The temple in theory is a double shrine, one component facing east and the other south with a shared hall conjoined at the east with the gudhamandapa of the third building which is a west facing a symmetrical assemblage for a trikuta complex. The interior of the western hall has four srikara pillars at the sala nave; three of these have the plain pipal-leaf ornament of the bell part. A couple of other varieties of columns such as a well cut bhadraka, Brahmakanta and Vyamisra or composite polygyonal are also met with. At the southern semi open facade are plain dwarf Citrakhandas of no note. The closed hall of the eastern shrine has also four srikara pillars. Both the ceilings have a full blown, safadala-kamala, halls. The super structure of Hara-Gauri is kept in one of the halls. The super structures of the eastern and western garbhagruhas have tritala dravida vimana with Brahmacchanda sikhara. The third or south-facing shrine has a phamsana Kadambanagara superstructure with a square sikhara. The earlier of the two inscriptions dated A. D. 1109, refers to the complex as of Bhogesvara, Amritesvara and Sarasvati. Today in the eastern and northern sanctuaries are lingas under worship.
